SUMMARY

Software Engineer focused on frontend development with **React**, with backend experience in **Node.js**, **Express.js**, and **Hono.js**. Skilled in building responsive web applications, RESTful APIs, authentication systems, and database-driven applications using **PostgreSQL** and **MongoDB**. Built and deployed multiple fullstack projects including an e-commerce platform and informational API using modern technologies such as **TypeScript**, **Tailwind CSS**, **Prisma ORM**, **Docker**, **Railway**, and **Vercel**. Strong analytical and problem-solving background from a **Bachelor's degree in Physics (Electronics & Instrumentation)** with collaborative development experience using **Git/GitHub**.

PROJECTS

[Benihbibit](#) – Simple E-Commerce Platform | Feb - Apr 2026

Developed a simple e-commerce application with secure authentication, product management, and responsive UI using a modern fullstack JavaScript ecosystem.

Key Features: Product catalog and detail pages, User authentication & encrypted passwords, Form validation and type-safe input handling, Responsive UI with reusable components, RESTful API and database integration

Tech: React, TypeScript, Tailwind CSS, shadcn/ui, Hono.js, Auth, bcrypt, Zod, React Hook Form, Prisma ORM, PostgreSQL, Scalar Docs

[Laptopedia](#) – Informational API | Dec 2025 - Jan 2026

Developed a RESTful API to serve structured laptop information with strong validation, type safety, and production-ready deployment.

Key Features: RESTful endpoints with consistent responses, schema-based request validation, interactive API documentation

Tech: Hono.js, TypeScript, Zod, Scalar Docs, Bun, Render.com, PostgreSQL, Supabase, Docker & Docker Compose

EXPERIENCE

Bearmentor Bootcamp

Full Stack Developer

Semarang, Central Java

Oct 2024- Present

- **Developed responsive frontend interfaces** using **HTML5**, **CSS3**, **JavaScript (ES6+)**, **React.js**, and **Tailwind CSS**, implementing component-based architecture, React Hooks, and mobile-first design principles.
- **Integrated RESTful APIs** by managing client-side state, asynchronous data fetching, and error handling to ensure reliable data flow between frontend and backend systems.
- **Built backend services** using **Node.js**, **Express.js**, and **Hono.js**, implementing CRUD operations, middleware, and centralized error handling following REST architecture.
- **Designed and managed databases** using **PostgreSQL** and **MongoDB**, writing SQL queries and applying basic data modeling to support application requirements.
- **Applied modern development workflows** by using **Git/GitHub**, **feature-based folder structure**, and **MVC patterns**, while deploying applications using **Vercel**, **Railway**, **Docker**, and

environment-based configurations.

PT. Roda Pasifik Mandiri
Account Receivable Staff

Semarang, Central Java
Oct 2024- Present

- **Handled invoicing and billing processes** to support company operations by preparing, validating, and issuing invoices based on delivery orders and pricing data, ensuring accurate and timely billing.
- **Assisted payment processing and collections**, tracking incoming payments and coordination with internal teams to resolve discrepancies and outstanding balances.
- **Performed reconciliation activities** between invoices, delivery records, and payment data to maintain data consistency and reduce billings errors.
- **Maintained organized financial records and documentation**, supporting audit readiness and improving traceability of billing transactions.
- **Supported company financial operations** by ensuring accurate record keeping and reliable invoicing workflows.

EDUCATION

Bearmentor Bootcamp
Fullstack Developer

2025 - 2026

Walisongo State Islamic University
Bachelor of Physics

2019 - 2024

Skills

- **Frontend Development:** HTML5, CSS3, JavaScript (ES6+), Responsive Web Design
- **UI Framework & Styling:** Tailwind CSS, Bootstrap, CSS Flexbox & Grid
- **Frontend Framework:** React.js, Component-Based Architecture, React Hooks
- **State & Data Handling:** Props & State, REST API Integration, Async JavaScript
- **UI/UX Implementation:** Figma to Code, Mobile-First Design, Basic Web Accessibility
- **Backend Development:** Node.js, Express.js, Hono.js, RESTful API Development
- **Database Management:** PostgreSQL, MongoDB, SQL Queries, Data Modeling
- **Authentication & Security:** JWT Authentication, Role-Based Access Control (RBAC)
- **Server & API Handling:** CRUD Operations, Middleware, Centralized Error Handling
- **Application Architecture:** MVC Pattern, Feature-Based Folder Structure
- **Dev Workflow & Version Control:** Git, GitHub, Branching Strategy, Pull Requests
- **Deployment & Production:** Vercel, Railway, Environment Variables, Build Optimization
- **Testing & Debugging:** API Testing (Postman, Scalar), Logging, Debugging
- **IoT & Embedded Systems:** Arduino, NodeMCU (ESP8266), Sensor Integration, Blynk
- **Data & Analysis:** Data Processing, Real-Time Monitoring Dashboard
